Deadline for manuscript submissions:

28 February 2019

Message from the Guest Editor

Dear Colleagues,

We invite you to submit your latest research in the area of discrete optimization to this Special Issue, “Discrete Optimization: Theory, Algorithms, and Applications” in the journal *Mathematics*. We are looking for new and innovative approaches for solving discrete optimization problems exactly or approximately. High-quality papers are solicited to address both theoretical and practical issues of discrete optimization. Submissions are welcome presenting new theoretical results, structural investigations, new models and algorithmic approaches as well new applications of discrete optimization problems. Potential topics include, but are not limited to, integer programming, combinatorial optimization, graph-theoretic problems, matroids, scheduling, and logistics.
